WORK EXPERIENCE

Magellan Solutions

Feb. 2025

Ojt Intern – Google App Script development

Quezon City, Metro Manila

- Developed and implemented an automated email logging system using Google Apps Script to streamline record-keeping.
- Configured and optimized scripts to capture email metadata (sender, timestamp, content, reply status) and trigger automated responses based on message type.
- Scheduled recurring executions every 30 minutes to ensure consistent, up-to-date logs and improve workflow efficiency.

SKILLS & INTERESTS

Skills

- Basic Python programming
- Arduino development and prototyping
- Hardware configuration and troubleshooting
- Circuit testing and optimization

Interests

- Arduino and IoT projects
- Hardware prototyping
- Programming and debugging

PROJECTS

Automated Plant Watering System

Mar. 2025

- Built Arduino-based automated irrigation system using sensor-driven logic
- Developed a basic web interface for controlling watering modes remotely
- Improved efficiency of plant care through automation

Arduino Arcade Game Collection

Apr. 2025

- Developed three interactive arcade-style games using Arduino
- Debugged hardware and optimized code for stable performance
- Implemented input/output components such as buttons and displays

EDUCATION

CIIT College of Arts and Technology

Sept. 2025 -Present

BS Computer Science, AI & Cloud Computing

Quezon City, Metro Manila

STI College Muñoz EDSA

July 2025

TechVoc ICT Strand Computer Communication Technology

Quezon City, Metro Manila

- Graduated with honors, demonstrating consistent academic excellence and strong performance across coursework.
